

# Full Customisation Services

Deltron's product range is enhanced by offering a machining and finishing service on any enclosure

## It's so easy!

From a single hole or cut-out, to a complex multi machined and fully assembled box build, Deltron Enclosures offers a complete customising solution for your project. Even customising enclosures offered by other manufacturers specified by you.

To make it easy for you, 3D CAD and PDF drawings are available on our comprehensive website for instant download for all Deltron Enclosures which can be integrated into your design software, allowing you to create a 3D model of your requirements quickly and simply. You can then email or fax your drawing to us (even hand drawn hole locations and specifications are acceptable) and our highly trained team will send you a quotation. For other manufacturers' enclosures, we will gladly source you a drawing which you can use to show your customisation requirements.

Our engineers will then create a drawing and sample of your requirements and upon your approval, begin the production process.

It really is that simple!

Having your enclosures customised by Deltron Enclosures means you can take advantage of low MOQ's or high volume production runs, reduced lead times\* and competitive pricing, along with a first class service from our fully qualified, skilled engineers. Put simply, a quick efficient service, saving you time and money.

\*when compared to using multiple sub-contractors.

## Services Include:

Tapping	Milling	Drilling	Holes	Cut-outs
Slots	Louvers	Studs	PEMs	Stand-offs
Assembly	Testing	Windows	Handles	

## Finishes Available:

Paint	Powder Coat	Nylon Coat	Engraving	Silk Screening
