

WEEE Compliance Statement

The European Union's Waste Electrical and Electronic Equipment (WEEE) Directive was implemented in member states during 2006.

There are a number of obligations imposed on Alpha 3 Manufacturing Ltd ("**Alpha 3**") as a "Producer" of certain qualifying electrical and electronic equipment.

Alpha 3 supplies products Business to Business

Alpha 3's compliance approach for each of these obligations is provided below.

WEEE Marking

All qualifying products that are subject to the WEEE Directive and supplied by Alpha 3 since 13th August 2005 are compliant with the WEEE marking requirements.

Such products are marked with the "**crossed out wheeled bin**" WEEE symbol shown above and in accordance with European Standard EN 50419.

Alpha 3 Certificate No: WEE/BH3810VQ

Information for Users

According to the timelines and requirements of the European Union member state WEEE legislation, the following user information is provided in English for all qualifying products marked with the WEEE symbol and subject to the WEEE directive.

The WEEE symbol on the product or on its packaging indicates that the product must not be disposed of with normal household waste. Instead such marked waste equipment must be disposed of by arranging to return to a designated collection point for the recycling of waste electrical and electronic equipment. By separating and recycling this waste equipment at the time of disposal will help to conserve natural resources and ensure that the equipment is recycled in a manner that protects human health and the environment.

Recycling & Climate Change

In the vast majority of cases recycling waste is more efficient than producing new products from virgin material. This results in lower emissions of those greenhouse gases that cause climate change and helps safeguard resources.

Your contribution has helped the UK to achieve the recovery of 8,056,734* tonnes of packaging during 2017.
